DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “pipeline has ends and the tube is attached to the ends of the pipeline” in claim 4 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, the recitations of “the material” in lines 4 and 5 are inconsistent with the recitation of “substance” in line 2.

Claim 9 recites the limitation “the material” in line 3. There is insufficient antecedent basis for this limitation in the claim. The recitations of “the material” in line 3 is inconsistent with the recitation of “the liquid” in lines 1, 4, 5 and 6.

Regarding claim 11, the claim dependency has been omitted.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3743

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Applicant's Prior Art Figure 2.

Claims 1 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Nakajima.

Claims 1 and 6-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Smith.

Claims 1, 3 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Michie, III et al.

Claims 1, 3 and 7-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Eberhart (Figure 1).

Claims 1, 3-5 and 7-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Mellsjo.

Regarding the rejections above, it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. Ex parte Masham, 2 USPQ2d 1647 (1987). Therefore, whether the tube or pipeline contains the heating liquid is of no patentable moment.

Claims 1-5 and 7-11 (as understood) are rejected under 35 U.S.C. 102(b) as being anticipated by Zelnik. Regarding claim 2, the outer jacket with inlet 10 and outlet 11 is read as an "insulator," where the liquid/substance/material in pipeline 1 does not exchange heat with the surrounding environment.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
